PROFILE

Aerospace Engineering student focused on Space Systems and MBSE, combining structural analysis with advanced IT automation. Lead developer of an MBSE-based Systems Engineering & Digital Twin platform for the Space Research Group at the University of Padua, ensuring ECSS/NASA-compliant mission data management. ST&M Subsystem Engineer for the AlbaSat 2U CubeSat, co-authoring FEM-to-test correlation work presented at the 4S Symposium 2026.

WORK EXPERIENCE

Jul 2026 – Present

Scientific Peer Reviewer, Bon View Publishing

Archives of Advanced Engineering Science (AAES) (Voluntary)

- **Vetted Space Weather Research:** Benchmarked manuscripts to validate data accuracy, numerical models.
- **Upheld AAES Publication Criteria:** Appraised research methodology, ensuring 100% compliance with journal standards.

Mar 2026 – Present

IT Software Development & Management, Space Research Group, University of Padua

Digital Twin Platform Voluntary Collaboration

- **Engineered Cloud MBSE Backend:** Built a Supabase SQL platform replacing static spreadsheets, cutting data query times by ~60% across satellite workflows.
- **Automated ESA/NASA Reporting:** Developed Python scripts to process live mass/power budgets into PDF/DOCX reports, reducing compliance efforts by ~40%.
- **Optimized Product Tree & Sync:** Designed dynamic UI sampling and REST APIs to streamline subsystem onboarding and sync external simulation tools.

Contact Person: Dr. Lorenzo Olivieri | lorenzo.olivieri@unipd.it | +39 049 827 6892

Nov 2025 – Present

ST&M Subsystem Engineer, University of Padova

- **Simulated ECSS Structural Dynamics:** Analyzed AlbaSat 2U CubeSat STM finite element models to guarantee compliance with launcher mechanical limits.
- **Correlated Hardware Mass Properties:** Disassembled lab prototypes to measure physical components, optimizing FEM accuracy against empirical data.
- **Refined FEM via ESA Test Data:** Processed ESA CSF vibration campaign results to improve model accuracy and co-authored the conference paper.

Aug 2025 – Present

IT Specialist, Spartan Health

Promoted from technical support to lead digital transformation, managing end-to-end IT infrastructure.

- **Engineered "DriveGen" Automation:** Built a Google Apps Script/Node.js document engine via webhooks, reducing manual reporting time by >80%.
- **Architected CRM & Support Middleware:** Integrated CRM with GrooveHQ using custom logic to automatically categorize, route, and manage support tickets.
- **Deployed Logistics Scraper & Web UI:** Created real-time shipping scrapers with Telegram alerts alongside custom responsive frontend web services using HTML/CSS/JS.

Jan 2026 – Present

IT Specialist, Dog Welfare Ltd

- **Built IMAP/SMTP Communication Bridge:** Developed a lightweight, secure mailing suite, cutting platform operational costs by ~30%.
- **Engineered VSL Analytics Visualizer:** Built a custom tracking tool to parse Video Sales Letter metrics, boosting visual data analysis efficiency.

Aug 2025 – Feb 2026

IT Manager & Systems Architect, ProBiz Consulting LLC

- **Architected API Data Pipeline:** Integrated GoHighLevel, Make, and Google Sheets via REST APIs/webhooks, reducing data sync latencies by ~50%.
- **Engineered Dynamic Middleware Logic:** Implemented Round Robin workload algorithms and unidirectional sync protocols, eliminating 100% of database version conflicts.
- **Authored Technical System Documentation:** Created comprehensive workflow mappings and integrity constraints, cutting onboarding and system maintenance time by ~30%.

Aug 2025 – Present

IT Specialist / Freelance, Mega Fitness

- **Automated Shipment Tracking:** Deployed a custom Fullship scraper to ingest carrier data, automating status updates for 500+ equipment orders.
- **Streamlined Internal Workflows:** Replaced manual data entry with automated API bridges, cutting operational processing bottlenecks by ~50%.

Mar 2025 – Nov 2026

Salesperson, Spartan Health & Mega Fitness

- **Managed 130+ Monthly Leads:** Converted warm and cold prospects via structured pipelines.
- **Designed Excel Dashboards:** Formatted tracking sheets to streamline lead data workflows.
- **Secured 5-Star Trustpilot Reviews:** Directed client onboarding, earning direct online mentions.

May 2023 – Oct 2025

Head Waiter Contract, Trattoria Al Faro • Castion

- **Led Floor Operations:** Supervised shift teams in high-volume settings to optimize table turnover and service speed.
- **Maintained Order Accuracy:** Ensure a high level of guest satisfaction.
- **Trained Service Team:** Mentored new waitstaff over 3 years on hospitality standards and menu upselling techniques.

- **Led Peak Floor Operations:** Managed front-of-house workflow during peak seasons, handling 300+ daily covers while ensuring smooth guest flow.
- **Coordinated Multi-Role Teams:** Supervised 6+ staff members to maintain high service quality and order accuracy under high-pressure shifts.
- **Served International Clientele:** Delivered multilingual service to foreign guests, improving communication efficiency and guest satisfaction.

- **Assisted 3D CAD Modeling:** Generated 3D models and technical documentation for product design.
- **Maintained Industrial Circuits:** Wired panels, integrated inverters, and resolved system faults.

EDUCATION

- Relevant coursework: Structural Mechanics, Aerospace Systems, Fluid Dynamics, Aerospace Flight Dynamics.
- Active member of the Alba CubeSat team—ST&M (Structural & Mechanisms) subsystem.
- Active IT Developer for Research Group.
- EQF level 6.

- IT infrastructure, programming, electronics and network administration. Final grade: 87/100. EQF level 4.

LANGUAGES

Italian	Native speaker	Spanish	B1
English	B2		

AWARDS

Co-author. Presented structural design and FEM-to-test correlation of the AlbaSat 2U CubeSat. FEM analysis performed in ANSYS Workbench 2025 R1 and SolidWorks; experimental testing at ESA ESEC-Galaxia. Journal/conference: 4S Symposium 2026—Small Satellites Systems and Services.

COURSES

CREATIVE WORKS

Chrome extension providing predictive linguistic assistance through generative AI in chats, emails and forms. Built with React 19, Tailwind CSS and Google Gemini 1.5 Flash, with real-time semantic analysis and suggestion-first UX.

Cross-platform personal finance management application automating expense entry with AI, multi-tenancy, localization, multi-currency conversion, Telegram integration, Gemini NLP, Google Sheets persistence and financial visualizations.

Linguistic consultation interface using Hugging Face Transformer inference APIs to provide contextual definitions, synonyms and semantic explanations, combined with Pexels imagery.

Full-stack web application for designing, managing and preliminarily simulating space missions. Uses React, FastAPI, Python, SQLAlchemy and simulation modules for Delta-V, fuel mass, launch windows and orbital transfer times.

SKILLS

MBSE & Systems Engineering (ECSS/NASA) (Experienced) • FEM Structural Analysis (ANSYS / SolidWorks) (Experienced) • Vibration Testing & Data Correlation (Proficient) • Orbital Mechanics & Mission Simulation (Experienced) • Python (FastAPI / Data Processing) (Experienced) • JavaScript / TypeScript (React / Node.js) (Experienced) • SQL & Database Architecture (Supabase / PostgreSQL) (Experienced) • REST APIs & Webhooks Integration (Expert) • Business Process Automation (Expert) • AI & LLM Integration (Expert) • Web Scraping & Workflow Automation (Experienced) • Git & Version Control (Proficient) • Industrial Electrical Systems & Wiring (Beginner) • Technical Writing & Reporting (Experienced) • Team Leadership & Operations Management (Experienced) • AI Fundamentals & Concepts (IBM Certified) (Proficient) • Peer Review & Scientific Evaluation (Proficient)
